Sprint 2 Plan
Product Name : Smart Class Planner
Sprint Completion Date: Jul 10
Revision number: 2
Revision Date: Jul 9

- **Goal:** Further on the process, we want to provide courses of major requirement and GE requirement, which are provided in the following quarter.

- **Task listing , organized by user story:**

- **User story 1**
—As a user, I want a website which can display courses in their provided quarters.
(Time estimate : 1.5 days)
- **User story 2**
—As a user, I want a website which could label the courses with course types.(Time estimate : 0.5 days)
- **User story 3**
—Developer story: As a developer, I will design 4 list to represent courses which are provided fall, winter, spring and summer. (Time estimate : 1 days)
- **User story 4**
—As a developer, I will tag these courses so that they can be displayed on specific section of the website. (Time estimate : 0.5 days)

- **Team roles** :
Chin-shu Shao : Product Owner, Developer
LEI JIAO : Scrum Master, Developer
Zhongqi Chen : Developer
